

Colour scheme same as Scratch (checked does not seem to be copyrighted)

Indicates state of recording ("Press recording to start", "Moving", "Capturing", "Captured", "No Person in Frame", Too Dark")

● Make Me A Sprite

File Edit Settings

Sprite name input box (turns red if invalid)

Enter Sprite Name

Scratch file path

Take picture button (also can be done with space bar)

Start recording (starts the pose detector). R also starts this. Becomes square when it has started to become a stop button

No Person In Frame

Have webcam showing even while not running. Lets webcam boot up before recording starts
